DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. **Claims 1 and 8** are rejected under 35 U.S.C. 102(e) as being anticipated by Niimi (US Patent No. 6,084,974).

Regarding **claim 8**, Niimi discloses a digital signal processing device, which is capable of dealing with signals of a wide dynamic range. Niimi discloses a means for storage to in which gain characteristics are stored (col. 6-lines 28-38). Niimi further discloses assessing the amplitude with respect to the gain (col. 7-lines 33-41). Niimi further discloses receiving an input signal, which has a gain characteristic, and generating a gain value in response to the input signal (see claim 9) wherein for each sample the gain corresponds to the amplitude.

Regarding **claim 1**, it is interpreted and thus rejected for the same reasons as set forth above in claim 8. Since claim 1 discloses a method, which corresponds to, the apparatus of claim 8; the method is obvious in that it simply provides functionality for the structure of claim 8.

Conclusion

3. Claims 2-7 and 9-14 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Lin et al. (US Patent No. 6,088,461) discloses a dynamic volume control system.

Bird (US Patent No. 5,784,476) discloses audio signal reproduction.
